RELEASE NO: 02 - 38

## Notice to Mariners: Rocket Launch October 27

The test flight of a Lockheed-Martin hybrid sounding rocket from the NASA Wallops Flight Facility is scheduled for 3 to 6 a.m., Sunday, October 27. The backup launch days are October 28 and 29. The area in the Atlantic Ocean that poses a danger to mariners during the project is posted on the Boaters Launch Information page under the Wallops web site at [www.wff.nasa.gov](http://www.wff.nasa.gov). Boaters are asked to remain clear of this area during operations.

Wallops will operate an alternating red and white beacon on Wallops Island beginning at 30 minutes before the launch. The beacon will be turned off when the mission is completed and the danger to mariners no longer exists. In addition, boaters may tune to Marine Channel 12 to monitor the operations.

Mission updates and completion of the mission will be noted on the Wallops launch status line at 757-824-2050.

Thank you for your assistance and support.
